Comments from WR Biologist:

Survey, 515077255 – Sucker Brook at Aubin Street 0- Poor fish community in 2014 and 2015. Could be proposed to list for degraded biological community during next listing round.

The modeled NC was retained because the fish survey failed both of the tolerance tests, indicating the fish community may be degraded and should therefore not be used to verify the NC. If future monitoring along this reach provides more reliable fish data for a Verification, additional monitoring and Verification of the NC is recommended.
