

Natural Community Verification Report

Waterbody Name (WBIC): SUCKER BROOK (516000)

Swims Station ID: 10042944

Survey Sequence Number: 515078851

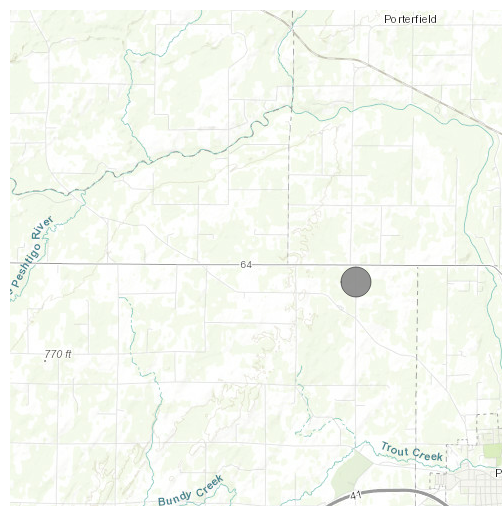

This NC Verification Report was run on Sucker Brook 2m US Farm Road Crossing adjacent to CTH E, (10042944), located in MARINETTE County with fish Survey Sequence Number 515078851 sampled on July 6, 2015. The Natural Community for this station was verified by helmuth for Hudak on July 30, 2019.

The Natural Community was modeled *Warm Transition Headwater* and is now Verified as *Warm Transition Headwater* .

Fish captured

Species	Count
CENTRAL MUDMINNOW	3
JOHNNY DARTER	2

Survey location

Guild percentages

Thermal	Percent.Indiv.	Size	Percent.Indiv.	Tolerance	Percent.Indiv.
Coldwater	0	Small	60	Intolerant	0
Transitional	100	Medium	40	Intermediate	40
Warmwater	0	Large	0	Tolerant	60

Warm Transition Headwater Guild Test

Comments from WR Biologist:

Survey, 515078851– Sucker Brook The modeled Natural Community for this site is Warm Transition Headwater - too few species but later confirmed.

The modeled NC was retained because the fish survey failed both of the tolerance tests, indicating the fish community may be degraded and should therefore not be used to verify the NC. If future monitoring along this reach provides more reliable fish data for a Verification, additional monitoring and Verification of the NC is recommended.
