

Exhibit "D"

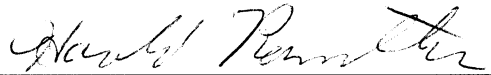

TRM Grant Project Name
Ramthun Waste Storage Project

Part II., Question 3.B.1.c.: Letter of Support

I Harold Ramthun I understand that significant effort is required by LWCD to locate, apply for and administer public cost share dollars; and to plan and design conservation practice(s). Hence, this letter represents my sincere intentions to accept and install a Manure Storage Facility if cost sharing should become available through this Targeted Runoff Management Grant. Furthermore, I agree to do the following if approved by this grant:

- Enter into a formal Cost Share Agreement (CSA) with Washington County, or other applicable agency;
- Abide by the terms and conditions of the signed CSA, including but not limited to maintaining the cost-shared practice(s) for the time period specified in the CSA (typically 10-15 years);
- Allow the Land & Water Conservation Division to conduct a Resource Evaluation of my property, including but not limited to a determination of the compliance status with the state's agricultural performance standards and prohibitions under NR 151, *Wisconsin Administrative Code*; and,
- Work cooperatively with the Land & Water Conservation Division in developing and implementing a resource management plan which addresses significant soil erosion and water quality concerns on my land.

Signed this 10 day of April, 2007

Harold Ramthun
