Reach Designation: Source to Wolf River

CRITERIA

RELATED INFORMATION

SOURCES OF POLLUTION

No significant impacts from actual or potential point sources or culturally induced nonpoint sources

If this waterbody did not receive a check in each of the 4 categories, but based on your professional judgement and overriding environmental concerns, you still believe that this should be an Outstanding or Exceptional Resource Water, explain why.

This is another prime cold feeder stream of the Wolf River with good natural reproduction of native brook trout. It is an important feeder of the Wolf and should have equal protection as Outstanding Resource Waters.
