Proposal Summary	
Funding Opportunity #:	EPA-R5-GL2010-1
Program Area:	Innovative Environmental Approaches
Focus Area:	Accountability, Education, Monitoring, Evaluation, communication, and Partnerships
Proposal Name:	Innovations to improve stormwater treatment
Organization Name:	University of Wisconsin-Madison
Proposal #:	EPAGLNPO-2010-AEMECP-9-308-386
Submission Date:	2010-01-25 14:00:14
Proposal Funding Request:	\$411,883
Brief Project Description:	We propose to test innovative environmental approaches to treating stormwater, using varied hydroperiods and native plants (at multiple diversity levels) to address not just suspended solids (as in conventional stormwater ponds) but also nitrogen and dissolved phosphorus, thus achieving beneficial outcomes for streams, wetlands and nearshore waters of Great Lakes watersheds. With our partners, the Wisconsin Chapter of the Nature Conservancy and the Environmental Law Institute, we will identify opportunities within the Pensaukee Watershed (Green Bay) to improve stormwater treatment so that fewer nutrients will make their way to coastal wetlands and nearshore waters.
