Proposal Summary	
Funding Opportunity #:	EPA-R5-GL2010-1
Program Area:	Enhanced State/Tribe Fish Consumption Advisory Support
Focus Area:	Toxic Substances and Areas of Concern
Proposal Name:	Mercury testing & updating tribal walleye consumption advice
Organization Name:	Great Lakes Indian Fish and Wildlife Commission
Proposal #:	EPAGLNPO-2010-TX-2-1142-453
Submission Date:	2010-01-29 10:04:06
Proposal Funding Request:	\$458,524
Brief Project Description:	GLIFWC will determine mercury levels in walleye, lake trout, whitefish, cisco, and siscowet from Lake Superior and walleye from inland lakes. Test results for selected fish species and areas in Lake Superior will be compared with data from previous testing. Results from inland waters will be used to update tribal and lake specific GIS maps and consumption advice aimed at reducing health risks associated with consuming mercury contaminated walleye. Indigenous communities rely on fish as a source of subsistence. Therefore, monitoring mercury in fish flesh in harvested waters is imperative.
