

**New Members and Leaders Recruited during the  
Marengo River Watershed Partnership Project**

**Bad River Watershed Association  
December 2010**

The following is a list of 184 people that participated in the Marengo River Watershed Partnership (MRWP) Project and provided a contribution that was used to develop the Marengo River Watershed Action Plan. Citizens were considered to have provided a contribution to the project and the action plan by doing field work through water quality monitoring and/or stream assessments, completing a MRWP Project survey, interacting with BRWA staff at community events, and attending and providing input at MRWP Project meetings regarding the vision for the future of the watershed, identifying issues and concerns about the watershed, and/or providing specific project ideas and their locations in the watershed.

The first list is a comprehensive list of all the MRWP project participants. The second list identifies people that became leaders during the project by participating on a project team, giving a presentation at meetings, adopting new water quality sites in the watershed, volunteering with the stream assessments, or initiating stewardship projects on their property.
