

Wisconsin Department of Natural Resources SWIMS Project Summary

General Project Information

Project ID: GLRI-00E00876-sub2

Name: Kiwanis Park Shoreline Restoration

Type: Great Lakes Restoration Initiative

Subtype: Habitat

Status: ACTIVE

Start Date: 07/19/2011

End Date: 12/31/2099

Purpose: The goal of this project is to restore the terrestrial and aquatic habitat of the shoreline, as well as stabilize the riverbanks to reduce sedimentation and associated habitat impacts. Actions undertaken, as part of the project will include:

- Reconstructing or retrofitting existing outlet structures with riprap and engineered flow diversion structures to address erosive flows from the storm water outfalls.
- Stabilizing riverbanks utilizing toe erosion structures in combination with geotextile fabrics and vegetation re-establishment. Bank slopes will be "cut-back" where possible to provide more stable profiles. However, encroaching right-of-way lines and roadways, in combination with existing steep slopes and drop-offs, will make this technique particularly challenging. Existing shoreline debris (concrete and asphalt) will be removed.
- Re-establishing native vegetation along the riverbank to facilitate restoration of habitat and reduce the impact of non-point storm water runoff. This buffer will be a combination of native trees, shrubs and herbaceous vegetation. Three growing seasons of maintenance and monitoring of vegetation during buffer establishment will be performed following buffer installation.

Objective:

- Restore riparian and shoreline habitat in the Kiwanis Park area.
- Naturalize the shoreline and retrofit storm water outfalls to reduce erosive flows to maintain a stable shoreline. Re-establish native species and provide a buffer along the shoreline.

Comments: \$2,115,000

- Outcome:**
- Restoring and stabilizing ¾ mile of shoreline habitat.
 - Managing invasive plants and restoring riparian and emergent vegetation.
 - Establishment of a buffer along the Kiwanis Park shoreline.
 - Retrofitting at least three major and several minor stormwater outfalls to improve habitat and decrease erosive flows.

People

Name	Role	Status	Start Date	End Date	Organization	Comments
HRON, STACY L	COORDINATOR	ACTIVE	07/29/2011		Wisconsin DNR	
PAPPAS, VICTOR C	SUPERVISOR	ACTIVE	09/23/2011	07/29/2011	Wisconsin DNR	

Project Statuses

Date	Reported By	Status	Comments
12/31/2011	LAUREL LAST	Progress: 0-25% Cor	This work is being completed in partnership with the City of Sheboygan and Sheboygan County under a sub-award aid agreement. The agreement with these partners has been completed for the design phase of the project. A contractor has been hired to complete project design (along with 2 other projects) and the design is in progress. The QAPP is in progress as well. The USGS has been retained to collect and analyze hydrology and hydraulic data to support these restoration projects (see separate report). Approx. 20% complete Problems encountered: None.

Project Status Detail

Question	Answer

Wisconsin Department of Natural Resources SWIMS Project Summary

Question	Answer
1. Reporting Timeframe (Q1) (Q2) (Q3) (Q4):	Q1 and Q2 (July 1st through December 31st, 2011)
2. Amount expended this reporting period:	None.
3. Subcontracts or subgrants awarded this reporting period:	City of Sheboygan and Sheboygan County--\$485,000 for design phase for all 3 habitat restoration projects. USGS--\$68,500 DNR (\$17,000 USGS match) for collection and analysis of hydrology and hydraulic data to support these restoration projects (see separate report). QAPP in progress.
4. QAPP (Project Plan) status:	None.
5. Local services and/or products purchased this reporting period:	None.
6. Number of jobs created this reporting period:	None.
7. Work accomplished this reporting period:	This work is being completed in partnership with the City of Sheboygan and Sheboygan County under a sub-award aid agreement. The agreement with these partners has been completed for the design phase of the project. A contractor has been hired to complete project design (along with 2 other projects) and the design is in progress. The QAPP is in progress as well. The USGS has been retained to collect and analyze hydrology and hydraulic data to support these restoration projects (see separate report). Approx. 20% complete Problems encountered: None.
8. Work goals for coming reporting period:	The contractor will complete preliminary project design, begin final project design, and obtain full QAPP approval.
