Station 10033900
(new/pending)

Large river macroinvertebrate collections with artificial substrate samplers, 2005

River: BLACK Station: Opelt Ave

Deployment: Date: 06/20/05 Personnel: Wesley Barnett

Retrieval: Date: 08/01/05 Personnel: BW Hansen

Lat: 44 . 91681 Long: 90 . 62390

Deployment method: streambed snag Nutrient sample date: 8/1

D.O. 6.67 Temp. 27.0 °C Cond 143.9 Turbidity 18.0 ntu

Sampler location & deployment notes: Bank: R/D Dist. from bank 20 m

US landing on Opelt Ave. ~~300m~~ 515ft.

MAP

Habitat:

Substrate %: boulder ____ . cobble 25 . gravel 50 . sand 25 . silt ____ . clay ____ .
Snags: no. / 100m ____ . Avg. size ____ dbh. Deciduous Coniferous

Riparian land use, vegetation, and condition _____

Water depth at sampler location: At deployment 1.7 m. At retrieval 1- m.
Sampler height above substrate 0 m.

Retrieval notes: N.B.S

WQ looks poor. ↑ brown sludge on surface.
W flow - stagnant

dry
run
