

Washburn County Learn About Your Lake Programs Open to the Public

Loons, frogs and lake animals continue to fascinate children and families. Come to one or more of our *Learn About Your Lake* presentations to learn about critters in and around your lakes. Have fun listening and learning about wildlife and what you can do to help keep them around your lake.

Sessions 1 **Loony About Loons** Erica LeMoine, Northland College Loon Watch Coordinator, will teach you all about loon calls, loon migration, nesting and other fascinating loon facts. Get a free loon poster or purchase a loon mug and learn what you can do to help loons.

Session 2 **Living with Bears, Beavers, Bunnies and Birds** Chris Cold, Wisconsin DNR wildlife educator and naturalist, will discuss the fascinating and sometimes nuisance animals that inhabit our forested lakeshores. Meet Chris and his live critters and get some tips about attracting birds and other wildlife to your lake shore.

Session 3 **It Isn't Easy Being Green: Frogs in and Around Your Lake** John Haack, University of Wisconsin Extension Natural Resources Educator, will share fun Wisconsin frog facts and teach you to recognize different frog calls. Expect a bit of frog show and tell, handle a live frog and get tips for helping frogs around your lakeshore.

Program times and locations: *If you plan to come please e-mail us at learn.lakes@yahoo.com to let us know what session(s) and location(s) you plan to attend. We need your registration to help us plan for chairs, coffee and snacks.*
