- Notice of Discharge Program (ch. NR 153)
- Urban Nonpoint Source & Storm Water Management Grant Program (ch. NR 155)

NOTICE: This Final Report is authorized under ss. 281.65 and 281.66., Wis. Stats., and chs. NR 153 and NR 155, Wis. Admin. Code. Personally identified information collected will be used for program administration and may be made available to requesters as required under Wisconsin Open Records Law [ss. 19.31-19.39, Wis. Stats.].

INSTRUCTIONS: Your grant agreement requires you to submit a Final Report with your final reimbursement request. This Final Report form must be used in conjunction with the "FINAL REPORT INSTRUCTIONS." The instructions detail how to complete and submit the report to DNR as described in the instructions.

5. Additional Information. (Space will expand to fit your text.)

The City obtained a Construction Grant from the WDNR for design and construction of a new stormwater quality pond. The purpose of the construction project is to reduce non-point source pollution prior to discharge into the City's storm sewer system (MS4) and ultimately the West Twin River, a 303(d) listed waterbody for non-point source pollution. The project will also assist the City of Two Rivers with future NR 216 / WPDES Municipal Permit compliance and NR 151.13 requirements. Specific water quality goals for South Columbus Pond and it's 66 acre drainage area included a 86 +/- percent reduction in TSS and 36 +/- percent reduction in phosphorus.

6. Summary of Project Challenges. (Space will expand to fit your text.)

The project required a 4' clay liner due to permeable soils located onsite. Following pond construction, groundwater seepage caused the pond side slopes to 'slide' into the pool of water. A soils engineer determined optional plans to remediate the problem; Rip-rap was placed in the pond side slopes. In addition, the pond is located near an electricity sub station which requires groundwater pumping and containment in case of mechanical failure of the transformer; issues exist for a wet-pond near a groundwater pumping/containment system.
