**5. Additional Information** (Space will expand to fit your text.)

The Village of Fox Point, recognizing the regulatory changes that have occurred since the adoption of its 1999 Stormwater Management Plan, contracted with Strand Associates in 2008 to evaluate the past plan and to provide updates to the plan that incorporated and addressed current regulations. In particular, the current Stormwater Management Plan evaluated the NR 151 Runoff Management Rules that required, among other things, reduction of the total suspended solids (TSS) by 40% by March 10, 2013, from Village stormwater runoff. The current plan, which was adopted by the Village Board at its June 2010 Village Board meeting, proposes a number of alternatives by which the Village may attain its TSS reduction goal. Funding is proposed to be allocated to fiscal years 2011 and 2012 in order to achieve the necessary TSS reduction.

**6. Summary of Project Challenges** (Space will expand to fit your text.)

The largest challenges included evaluating the Village stormwater management system and determining feasible and economically prudent projects that might achieve the TSS reduction goals. Strand Associates proposed innovative methods, based on recent rulings from the Department of Natural Resources (DNR), that the Village could possibly implement in order to achieve the necessary TSS reduction. As a result of the recent rulings and innovative approaches, the contract duration extended beyond that which was originally anticipated. Nonetheless, the additional time used to gather supporting data and to evaluate the proposed alternatives proved to be fruitful as less intrusive and more economical approaches to achieving the TSS reduction goals were presented and, ultimately, included in the Stormwater Management Plan.
