- Targeted Runoff Management Grant Program (ch. NR 153)
- Notice of Discharge Program (ch. NR 153)
- Urban Nonpoint Source & Storm Water Management Grant Program (ch. NR 155)

**NOTICE:** This Final Report is authorized under ss. 281.65 and 281.66., Wis. Stats., and chs. NR 153 and NR 155, Wis. Admin. Code. Personally identified information collected will be used for program administration and may be made available to requesters as required under Wisconsin Open Records Law [ss. 19.31-19.39, Wis. Stats.].

**INSTRUCTIONS:** Your grant agreement requires you to submit a Final Report with your final reimbursement request. This Final Report form must be used in conjunction with the "FINAL REPORT INSTRUCTIONS." The instructions detail how to complete and submit the report to DNR as described in the instructions.

**5. Additional Information.** (Space will expand to fit your text.)

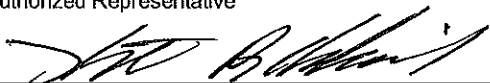

One storage facility was upgraded to meet current standards to collect milkhouse waste and lot runoff. An additional storage facility was added to collect silo leachate and all the first flush leachate estimated to be 120,000 gallons, plus an additional lot runoff is directed into the storage facility. With the 2 storage facilities storage amounts for the farm will be greater than 6 months. Runoff from the holding area and holding area lane flowed down close to a well then into the road ditch, so a small reception tank was installed to collect runoff from the holding areas and pump it into the new storage structure.

**6. Summary of Project Challenges.** (Space will expand to fit your text.)

Location of farm to Lake Wisconsin and residential areas result in conflict of uses. The site had constraints of roads and property lines that made it difficult to site the best management practices.
