**Subject:** FW: new Bythotrephes infestation - Star Lake, Vilas County

Hello All,

Spiny waterfleas were recently confirmed in Star Lake, Vilas County. See the below correspondence for additional information. The record has been entered into SWIMS and will appear on our website soon:  
[http://dnr.wi.gov/lakes/invasives/AISLists.aspx?species=SPINY\\_WATERFLEA](http://dnr.wi.gov/lakes/invasives/AISLists.aspx?species=SPINY_WATERFLEA).

I have phoned Kevin Gauthier and asked him to follow the communication protocol:  
<http://dnr.wi.gov/lakes/invasives/AISDiscoveryCommunicationProtocol.pdf>.

Please feel welcome to contact me with questions.

Maureen

**Subject:** new Bythotrephes infestation - Star Lake, Vilas County

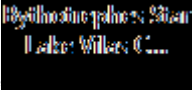

Hi all—

I wanted to let you know before I upload results to SWIMS this afternoon – I have a positive result for Bythotrephes in Star Lake, Vilas County (WBIC 1593100). This is evidently a new infestation in this lake. The tow was collected on 8-14-2013 by Jason Hayes and Katrina Punzel. Diane Daulton and Jeanette Wendler also did other AIS Early Detection Monitoring sampling on the lake on August 15.

The Bythotrephes were numerous in the sample. I've attached a pdf with images from Star Lake. SWIMS asks if the identification was verified – do these need to go out for independent verification, and to whom would they go?

Thanks,

Gina
